Agenda

- Introduction to the topic
- Challenges faced by building owners
- Building owner expectations
- Role and benefits of technology in asset management strategy
- Technologies and Innovations
- Q&A

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

fireaustralia.com.au

Topic Introduction

- Technology is playing an increasing part in an asset management strategy as building owners attempt to gain an **increasing oversight** into their building compliance, **deliver better outcomes** and **lower costs**.
- As clients invest more in the technology space in order to gain efficiency with an ever-decreasing delivery team, They are also expecting the same from their providers to gain efficiencies and reduce cost.

7 – 9 May 2024

Challenges Faced by Building Owners

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

fireaustralia.com.au

Client Expectations

Lower Cost

- Fix Costs Across contract terms
- Include higher routines
- Set annual increase amounts

Increase Visibility

- Enforce CMMS / Portals
- Report and monitor
- Utilise additional tools to provide more data

Drive Compliance

- Enforce Work order driven delivery
- Set strict KPI's on work completion

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

fireaustralia.com.au

Role of Technology in Asset Management

- Data Collection & Monitoring
- Predictive Maintenance
- Asset Tracking and Inventory Management
- Compliance and Risk Management
- Financial Planning and Budgeting
- Remote Monitoring and Maintenance
- Integration with other systems
- Real time view across portfolio
- **Most Important – What is going on is now accessible to anyone!**

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

Technologies and Innovations

Client Portals

Internet of Things (IoT)

Smart Barcoding
or Geotagging of
Assets

Virtual Reality

Mobile
Applications

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

fireaustralia.com.au

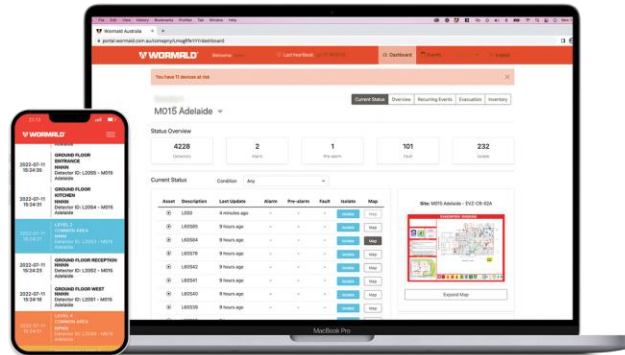

Client Portals

- Clients are expecting their providers to utilize their in-house systems
- These systems usually track and monitor contract KPI's so conformance is mandatory
- Explore integration opportunities

Internet of Things

- Several solutions on the market that allow fire systems to connect to a common cloud based database
 - Fire Detection – Alarms, Pre-alarms, longer history, isolations
 - Pumps – Pump operation, water usage, pressure, leak detection
 - Portables – Status of equipment in the correct location
 - Exit & Emergency Lighting – Real time data, remote test
 - Doors – Open / closed

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

fireaustralia.com.au

Smart Barcoding or Geotagging Assets

- Live asset register that is mapped to the site
- Addition of 3-D modelling to form part of baseline data
- Clients are adopting their own technologies to centralise data between capital planning and operations
- Ability to transpose live asset data on existing as-builts and cad drawings

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

Revision Schedule		WORMALD		Project Name		Drawing No.	
1	Issue for Construction	Wormald	Verder	64 de Mare Street, Maroochydore, QLD 4558	5000409	FD1000 Foam 5kg	TRANSMISSION ROOM 2 - 1

7 - 9 May 2024

Gold Coast Convention and Exhibition Centre

fireaustralia.com.au

Virtual Reality

- Fire Warden Training
- First Attack Fire Fighting Training
- Pump Room Simulations

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

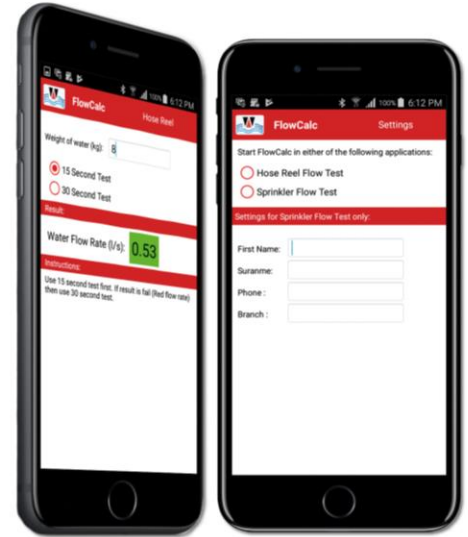

fireaustralia.com.au

Mobile Applications

- Applications for any specific task required
- Key is to find those that integrate with your workflow
- Review and optimise client applications

7 – 9 May 2024

Gold Coast Convention and Exhibition Centre

fireaustralia.com.au

Conclusion

- Customers have a number of expectations are driven from inherent challenges
- Technology and its proper application can be used to solve these issues
- There are countless options in the market that we as an industry can adopt to drive further value
